

Petition to protect the natural resources in the Addison Properties parcels

We ask the City to act to protect the wetlands, waterways, forests, wildlife, and other natural resources found on the Addison Properties parcels north and west of Executive Boulevard in Delaware, Ohio. This important ecosystem must be preserved! Over 80 acres of forests and the waterways that feed the Olentangy River found on this land are important to us as they are one of the last large parcels of natural resources in the city. We urge the City to conduct a feasibility study in regards to putting a park on the land to preserve these natural resources.
