---

Hello Mrs. Dinovo,

Here comes our comments to the Zoning Code changes with the request to be added to the official record, please!

Comment:

We very much ask that any changes to the Zoning Code will be decided on with great consideration of:

1. the rising urgent climate crisis .. and planting as many trees and native (pollinator attracting) bushes as possible
2. the wildlife .. and intentionally planning wild life pathways with so much construction going on, and more to come
3. the pollinators .. and intentionally planning and inviting all Delaware residents to plant native pollinator friendly flowers and bushes to guarantee

the growth of much needed vegetables and fruits, as pollinators have declined greatly in numbers.

We also ask that Delaware City Council looks into and signs the Plant Based Treaty as this is of yet greater and more far-reaching importance, locally as globally. Thank you, Rita & Brian Selle-Grider

Thank you so much and have a great day!

Rita & Brian Selle-Grider
